Career History

Full Time Member at Harris Farm Market Service, Redfern, as a Protein Department Section Lead (August 2024 - Till Now).

Part Time Worker at Prime Small Goods, Greenacre (July 2024 - August 2024)

Store Team Member at Woolworths Group, Mortdale (September 2023 - September 2025)

Information Technology Officer at Chautara Sangachokgadhi Municipality, Nepal (December 2014 - July 2023)

Key Responsibilities: In my capacity as a crew IT Officer, I offer technical aid and assimilate IT solutions for municipal administrative and business proceedings. I educate head staff and employees on the improvement of their IT and e-governance skills. I deal with the business software and tools, every software used in the business I arrange and make sure we document every tool used. I am responsible for the management of the implementation of the e-Governance solutions as well as the participation in financial planning/budgeting, and strategy/IT planning. My fields of competence include administration of research databases, digitization of resources and morphing of information centres for enhancing use of municipal resources and public service respectively.

Achievements: As an IT Officer, I had implemented organizational learning strategies such as trainings that would improve the usage of IT and e-governance among the civil employees of the municipalities. I spearheaded the increase in the use of electronic governance initiatives, which increased efficiency of delivery of administrative and public services. The following are some of the ways I improved service efficiency: upgraded the manner in which the databases were run and the community affairs computerized. I also coordinated the daily business operations through proper utilization of business software instruments. Moreover, I was involved in the processes of annual and

financial planning, and created information centres that would improve people's access to the municipal documents. The customer has highly appreciated my innovations designed to enhance the status of IT assets and services in municipal organizations.
